Ciclul de viata DevOps:

DevOps Lifecycle Diagram

Cele trei faze ale unui produs software care sunt prezente in abordarea DevOps T

- The Development Phase: In this phase, developers create the code for the application. They work with operators to test and Deploy the application to a staging or production environment.
- The Deployment Phase: In this phase, operators deploy the application to a production environment. They may also perform maintenance tasks on the application.
- The Operations Phase: In this phase, operators monitor and manage the application in production.

-

Componentele DevOps

- Continuous Development
- Continuous Integration
- Continuous Testing
- Continuous Deployment
- Continuous Monitoring
- Continuous Feedback
- Continuous Operations
