

Module 8: Course Wrap-Up

AWS Academy Natural
Language Processing

Module overview

Sections

1. Capstone project
2. Course summary
3. Bridging to certification

Section 1: Capstone project

Module 8: Course Wrap-Up

Capstone project

- For this project, you play the part of a machine learning (ML) developer.
- Scenario:
 - Environment: A training organization that recently developed a course about ML
 - Task: Build a visualization for the most common topics and terms that the course covers

Section 2: Course summary

Module 8: Course Wrap-Up

Course summary

You should now be able to:

- Describe the terms used in the natural language processing (NLP) ecosystem
- Identify how NLP can be used in business
- Indicate the range of problems, tasks, and solutions addressed by NLP
- Describe how to apply the ML pipeline to NLP

Course summary continued

You should also be able to:

- Use the ML pipeline to solve NLP problems
- Describe the evolution of NLP architectures
- Evaluate ML algorithms for sentiment analysis
- Create a solution for a sentiment analysis business problem
- Explain the use and purpose of Amazon Translate, Amazon Transcribe, Amazon Comprehend, and Amazon Polly

Section 3: Bridging to certification

Module 8: Course Wrap-Up

AWS Certification exams

Available AWS Certifications

Professional

Two years of comprehensive experience designing, operating, and troubleshooting solutions using the AWS Cloud

Associate

One year of experience solving problems and implementing solutions using the AWS Cloud

Foundational

Six months of fundamental AWS Cloud and industry knowledge

aws certified
Updated March 2020

Specialty

Technical AWS Cloud experience in the Specialty domain as specified in the *exam guide*

Certification capabilities

- The AWS Certified Machine Learning – Specialty certification validates the following abilities:
 - Select and justify the appropriate ML approach for a given business problem
 - Identify appropriate AWS services to implement ML solutions
 - Design and implement scalable, cost-optimized, reliable, and secure ML solutions

Certification requirements

Recommended knowledge and experience for the AWS Certified Machine Learning – Specialty certification:

- 1–2 years of experience developing, architecting, or running ML or deep learning workloads on the AWS Cloud
- The ability to express the intuition behind basic ML algorithms
- Experience in performing basic hyperparameter optimization
- Experience with ML and deep learning frameworks
- The ability to follow model-training best practices
- The ability to follow deployment and operational best practices
